## Summary

Python Full Stack Developer with hands-on experience designing, building, and deploying scalable web applications using Flask, PostgreSQL, SQLite3, REST APIs, and React.js. Built and deployed production-ready full-stack projects covering authentication, database design, backend APIs, responsive frontend development. Skilled in SQL optimization, RBAC, CRUD operations, and modern UI development. Seeking a Full-Stack Developer role to build scalable, user-centric applications.

## Education

**JNTUH College of Engineering**

*Bachelor of Technology in Electronics and Communication Engineering (ECE)*

**2021 – 2025**

**CGPA: 7.97 / 10**

## Technical Skills

**Languages:** Python, JavaScript, SQL

**Frontend:** React.js, HTML5, CSS3, Bootstrap5, Tailwind CSS, Chart.js

**Backend:** Flask, REST APIs, Gunicorn

**Databases:** PostgreSQL, MySQL, SQLite3

**Tools & Platforms:** Git, GitHub, Postman, VS Code, Render, PythonAnywhere, Vite

## Projects

**SmartCart – Full Stack E-Commerce Platform** 🐙

| **Tools:** Python(Flask), SQLite3, Bootstrap5, REST APIs

- Built a full-stack e-commerce platform with product catalog, cart management, and order processing using Flask MVC architecture
- Implemented JWT-based authentication and secured RESTful APIs with CRUD operations for products, users, and transactions
- Optimized SQLite3 queries and indexing, improving database retrieval performance by 30%
- Developed a responsive mobile-first UI using HTML5, CSS3, Bootstrap5, and JavaScript
- Deployed the application on PythonAnywhere with production-ready configuration

**TrackHire – Full Stack Job Application Tracker** 🐙

| **Tools:** Python(Flask), PostgreSQL, JavaScript, Chart.js

- Built a full-stack job application tracker with authentication, role-based access, and real-time status management
- Integrated Flask with PostgreSQL using psycopg2 and implemented secure password hashing
- Developed responsive dashboards with Chart.js for application analytics and insights
- Implemented search, filtering, edit, and delete functionalities for efficient tracking
- Deployed the application on Render using Gunicorn and environment-based configuration

**Harshitha React Portfolio** 🐙

| **Tools:** React.js, JavaScript, Vite, Tailwind CSS

- Designed and developed a responsive portfolio website showcasing projects, certifications, and technical skills
- Implemented reusable React components with scalable Tailwind CSS styling
- Optimized build and development performance using Vite

## Certifications

- AWS APAC Solutions Architecture Job Simulation – Amazon Web Services via Forage (2024)
- Responsive Web Design – freeCodeCamp (2024)
- Python Programming Masterclass – Udemy (2023)
- MySQL Bootcamp – LetsUpgrade (2023)

## Achievements

- Earned 5-Star Gold Badge in Python on HackerRank
- Built and deployed multiple full-stack web applications using Flask, PostgreSQL, and React
- Solved 100+ coding challenges in Python and SQL
- Developed interactive dashboards and analytics projects using Power BI and SQL
- **HackerRank Profile** – <https://www.hackerrank.com/profile/harshithaadiche1>
